Healthcare Furniture

Smart Furniture With Ingenious Design

Logic Healthcare is proud to service hospitals and clinics with furniture designed specifically for patients and their caregivers. Our collection of upholstered seating is engineered for high-use spaces to maximize comfort, functionality and productivity.

Logic's underlying strength lies in its origin with the parent company, Wieland Designs. Since 1976, Wieland Designs has been a leading design and manufacturing partner for world-class brands you encounter on a daily basis, working in the background to design, engineer, and build beautiful residential, hospitality, healthcare, contract, automotive and airline OEM products and sub-assemblies. From design to supply management, we've guided many brands to success and now offer our expertise to the end-user.

Logic Healthcare is proudly made in Goshen, Indiana.

We create common area and patient room furniture that is both stylish and comfortable - all without sacrificing durability.

Customize your seating to fit your patient's needs. USB power, arm cap finishes and two-tone fabric choices are just a few of the many options available.

LT2-A-V
