

UPLIFT RECLINER

FEATURES

UPLIFT RECLINER

The Logic UpLift Power Recliner employs a patented power mechanism that lifts the occupant vertically and forward to standing. While sitting, the back reclines fully into a lay flat position. Unlike conventional lift chairs, the UpLift Power Recliner does not tilt forward at the pinnacle of lift and instead - simply raises the resident into a standing position while maintaining a level plane horizontal to the floor. There is full arm support of the occupant until they gain stability to stand up and step forward. The recliner provides for a safer environment for both the patient and the care giver.

STANDARD FEATURES:

- Power lift to stand mechanism
- Full lay flat recline
- Ergonomic design
- Attached cord remote
- CAL TB 117
- 375 lb weight capacity

A	Overall Width	34"
